

Puff Pads

For over 50 years, A&H Worldwide has been the global leader in product packaging. What began with the invention of the traditional earring card, has since grown to one of the largest packaging producers in the world. From jewelry carding and boxing solutions to labeling, tagging and loss prevention packaging, A&H Worldwide remains the leader in the product packaging industry.

Puff pads are simply cushioned jewelry cards with more dimension. As effective as they are inexpensive, they have a raised surface which allows jewelry to be displayed securely. The extra padding helps to eliminate flopping or tipping, which can sometimes occur when using traditional carding. Available in many colors and finishes, puff pads provide a more elegant look for both costume and fine jewelry types. They are perfect for carding earrings, necklaces, rings,

pins, charms, ear cuffs, body jewelry, etc., and can be printed or hot stamped. We offer a large selection of punch designs and sizes.

We follow strict ISO 9001:2015 guidelines and use a completely automated manufacturing process which allows for exceptional quality and precise consistency with every puff pad we produce. A&H Worldwide also offers many different types of puff pad trays and inserts for beautiful countertop display.

Make A&H Worldwide your one stop solution for all your packaging needs. Call today for more information.
